DETAILED ACTION

Response to Request for Continued Examination(RCE)

1. This action is issued in reply to applicant's Request for Continued Examination(RCE) Paper No: 10) and Amendment B(Paper #11) filed on 10/27/03.
2. Independent claims 1,6,14,19,23,27 were amended. No claims were cancelled. None were added.
3. Claims 1-34 as amended, are pending.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-34 are rejected under 35 USC 103(a) as unpatentable over Ho(US Pat. No: 6,480,698) in view of Horowitz(US Pat. No: 6,349,290) and further in view of Munson(US Pat. No: 5,035,625).
6. As per claims 1-34 Ho discloses a system to teach a user based on his questions(Abstract)(col 2 lines 20-36) with a rule-based methodology(Fig 2/64) and an expert system databse(Fig 5)(Fig 6)(Fig 12)(Fig 13).Ho further teaches a study-materials generator(Fig 1/52) and an answer generator(Fig 1/100) and a question comparator(Fig 1/60) as well as topic

Art Unit: 3624

related tables(Fig 2/116) and semantic rules(Fig 2/110). Ho further teaches retrieving a question entered and presenting an answer and comparing the question with other questions(Fig 5/198). In addition, Ho teaches decomposing a question into component parts(Fig 7) and a database with a questions table and a question matching engine(Fig 12/529) and an answer retriever(Fig 12/539). Ho also teaches a grammatical structure analyzer(col 9 line 51-col 13 line 20) for questions and their components and ambiguous questions(col 18 lines 37-col 23 line 15) as well as filling in gaps of misunderstanding(col 23 line 16-col 27 line 40). In addition to that taught by Ho, Horowitz discloses a system for interactive and proactive advice to users on financial investment(Abstract)(Figs 1-4) including customer's intent and expression(Fig 3/12/10) as well as the bank's intent(Fig 4/18). Horowitz further teaches accessing sessions for personalized financial advice(Fig 6) as well as merging behavior data with financial data(Fig 9). Horowitz also teaches interactive and proactive sessions(Fig 12) and collaborative sessions of the client with the financial institution(Fig 26) over the internet(Fig 28). In addition to that taught by Horowitz, Munson teaches a computer game teaching method at the level of a student(Abstract)(Fig 1a)(Fig 1b). Munson further teaches a teaching program for a student(Fig 1a/10/16) and tutorials(Fig 1a/20/24) and a strategy at the student levels(Fig 1a/38) and a student-level of difficulty(Fig 1a/40). Munson further teaches displaying the correctness of the student answered question(Fig 1b/94) for more than one student(Fig 1b/98/104) and a scoring algorithm for the student-level answers(Fig 1b/110). It would have been obvious to one skilled in the art at the time of the invention to combine Ho in view of Horowitz and further in view of

Art Unit: 3624

Munson to teach the applicant's disclosure. The motivation to combine Ho in view of Horowitz is to teach expert questioning as applied to a financial advisory system that advises a client based on his needs to customize products to meet these needs around intelligent engines that self learn as enunciated by Horowitz(col 2 lines 5-11).The motivation to combine Ho in view of Horowitz and further in view of Munson is to teach expert questioning as well as student level questioning as enunciated by Munson(col. 1 lines 59-64) as applied to a financial advisory system that advises a client on investing based on client questions.

Response to Arguments

7. Applicant's arguments with respect to claims 1-34 as amended, have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. **THIS ACTION IS MADE NON-FINAL.**
